

A Kirkpatrick-based Framework for Safety & Sustainability in Aviation MRO

PROBLEM

Maintenance error in aviation MRO
drives accidents AND waste

Up to USD 189K per warranty claim;
rework + scrap + energy + emissions

INTERVENTION

Kirkpatrick 4-level evaluation
integrated with AS9100 & SMS

Reaction → Learning
→ Behaviour → Results

OUTCOME

Safety + Sustainability gains

–28% training failures

–35% non-conformances

USD 1.2 M annual savings

12-month case study at a multinational aircraft-engine maintenance facility
